  4* GROUP BY deptno
SQL> /

  COUNT(*)   AVG(SAL)     DEPTNO
---------- ---------- ----------
         1       2850         30
         3 2991.66667         20
         2       3725         10
```

7. WAQTD total salary needed to pay and number of SALESMEN in each department.

```
  1  SELECT sum(sal),count('SALESMAN'),deptno
  2  FROM EMP
  3* GROUP BY deptno
SQL> /

  SUM(SAL) COUNT('SALESMAN')     DEPTNO
---------- ----------------- ----------
      9400                 6         30
     10875                 5         20
      8750                 3         10
```

8. WAQTD number of employees with their maximum salaries in each job.

```
  1  SELECT count(*),max(sal),job
  2  FROM EMP
  3* GROUP BY job
SQL> /

  COUNT(*)   MAX(SAL) JOB
---------- ---------- ---------
         4       1300 CLERK
         4       1600 SALESMAN
         1       5000 PRESIDENT
         3       2975 MANAGER
         2       3000 ANALYST
```

9. WAQTD maximum salary given to an employee working in each department.

```
  1  SELECT max(sal),deptno
  2  FROM EMP
  3* GROUP BY deptno
SQL> /

  MAX(SAL)     DEPTNO
---------- ----------
      2850         30
      3000         20
      5000         10
```

10.WAQTD number of times each salary is present in the employee table.

```
  1  SELECT count(sal),sal
  2  FROM EMP
  3* GROUP BY sal
SQL> /

COUNT(SAL)        SAL
---------- ----------
         1       2450
         1       5000
         1       1300
         2       1250
         1       2850
         1       2975
         1       1100
         2       3000
         1        800
         1       1600
         1       1500
         1        950
